ANNEXURE A

Specifications for Ultra Turrax

The Ultra-TurraxHomogenizer can perform a wide range of laboratory and pilot plant applications. It gives reproducible results every time due to its constant speed, even with viscosity variations. The ULTRA-TURRAX® is a high-performance dispersing machine used for the production of a variety of emulsions and suspensions in batch operations. Using the rotor-stator principle, it is best suited for applications that cannot be accomplished using conventional stirring methods.

- Powerful dispersing instrument for volumes from 1.0 to 2000 mL(H2O) with LED speed display and resolution of 200 rpm
- Timer and counter function for the process control.
- Wide speed range from 3000 – 25,000 rpm that enables users to work at high circumferential speeds
- LED display for precise monitoring of set speed and actual speed
- The ultimate fineness after homogenisation should be approx. 50 µm for suspension and 10 µm for emulsion
- Dispersing tool should process sample volume from 1 to 50 mL and 1 – 100 ml
- Electronic overload protection
- Error code display
- Offers speed variation less than 2% during overload
- Should fall under protection Class of IP 30
- System should be compatible with cleaning tools, which are used to clean the dispersing tool.
- Device should have USB interface for remote control and data acquisition.
- System should be with proper stand and boss head and clamp to secure vessel.
